Supplement to GLOVE LINES
OmniTrust PL Polymer Gloves

Who are we? – Omni International LLC is a very progressive supplier of gloves in markets including Medical/Dental (all healthcare), food service, retail/consumer, industrial/janitorial and clean room.

What is a Polymer Coated Powder Free Examination Glove? Polymer Coated Powder Free examination gloves are made from natural rubber latex. They are coated with a special polymer resin on the inside. Polymer coated gloves do not discolor or contain an odor like some chlorinated latex gloves. The coating protects the user by reducing direct contact with natural rubber.

What is OmniTrust™ PL Polymer Coated Powder Free Latex Glove - #113 Series ? Our #113 series is a reduced protein latex examination glove with less than 50µg of protein per gram. This glove is micro-textured for added grip control without loss of tactile sensitivity. The glove is manufactured with a non-chlorination process thus maintaining the stretch characteristics of latex in its non-chlorinated state. A unique polymer lining gives this glove excellent donning characteristics. Flat packed for optimum dispensing. Available in sizes Small through Extra Large.

Features and Benefits

Latex – For the person who prefers a latex feel and conformity to the hand

Powder Free – LESS THAN 50µG OF TOTAL EXTRACTABLE PROTEIN PER GRAM

Polymer Lined - Makes donning the glove a breeze

Non-Chlorinated – Allows the latex to remain as close to it's "natural" state as possible. Also allows the glove to retain elasticity. Our Polymer Lined, Powder Free Latex Glove is whiter and odorless. (Chlorinated gloves tend to retain an odor).

Micro-Textured - Offers the wearer complete hand texture with a more tactile texture on the fingertips. Great for grasping glassware, instrumentation

Perfect for many markets especially:

Medical/Laboratory – An excellent glove for instrument utilization as well as grasping syringes, needles and glassware.

Veterinary – Excellent for holding small animals, especially those with slick skins.

Long Term Care – The textured finger tips and micro-texture glove body allow enough texture to grip the skin/clothing for maneuvering the ambulatory patient.

SALES WORD HIGHLIGHTS - Polymer Lined for ease of donning – Non-Chlorinated – More Stretch - Reduced Protein – Micro-Textured for grip control without loss of tactile sensitivity - Powder Free - 100 per box - Flat Packed for Optimum Dispensing
