### OmniTrust CF Nitrile Gloves

**Who are we?** – Omni International LLC is a very progressive supplier of gloves in markets including Medical/Dental (all healthcare), food service, retail/consumer, industrial/janitorial and clean room.

**What is a nitrile glove?** Nitrile is an excellent alternative to natural rubber latex! Maybe one of its strongest benefits is its resistance to chemicals. Nitrile Powder Free Examination Gloves are manufactured using nitrile synthetic material and are ideal for those who are allergic to natural rubber latex. They provide easy donning without the use of lubricating powder that may cause contact dermatitis on skin. In addition, nitrile film is more puncture resistant than latex or vinyl and offers excellent tactile sensitivity.

**OmniTrust™ CF Powder Free Nitrile - #212 Series - OmniTrust™ Uniquely Patented Comfort Formulation (CF), Low Modulus, 100% Nitrile Powder Free exam gloves** contain no natural rubber latex and no Carbamates, Thiurams or Mercaptobenzothiozole (MBT). These are common accelerators found in most gloves that may possibly cause hand irritation. Featuring the strength, static and chemical resistance of Nitrile, these gloves have excellent donning characteristics and textured fingers for excellent grip control. The Omni #212 Gloves have been tested for use with Chemo Therapy drugs. Specific chemical data resistance information is available upon request. Flat packed for optimum dispensing. Available in sizes Small through Extra Large.

\*U.S. Patent No.Re 35,616

## **Features and Benefits**

**Chemotherapy Drug Approved – Makes this glove almost universally accepted.**

**High Chemical Tolerance – Resistant to most chemicals (See the Omni Chemical Tolerance chart)**

**Smooth Yet Textured – Perfect for many markets especially:**

- **Acute Care** – Can be used anywhere in the hospital.
- **EMS/Police/Fire** – An excellent glove for the “on scene” caregiver. Preferred by many departments.
- **Dental** - The smooth surface affords maximum patient comfort while the textured finger tips promote precision instrument manipulation.
- **Medical/Laboratory** – An excellent glove for instrument utilization as well as grasping syringes, needles and laboratory glassware.
- **Long Term Care** – The smooth surface allows easy comfortable patient movement while the textured finger tips allow enough texture to grip the skin/clothing for maneuvering the ambulatory patient.

**Sales Word Highlights** - Patented “Comfort Formulation”- Use with Chemotherapy Drugs – Strong Chemical Resiliency – Heavier than our Lite Touch, yet lighter than most every glove in its class – Accelerator Free – Textured Finger Tips - great for EMS/Fire/Police – Latex Free – Powder Free – 100 per box - Flat Packed for Optimum Dispensing

**Ordering Information.** Packaged 100 per box, 10 boxes per case, 1,000 gloves per case.
