OmniTrust Vinyl Gloves

Who are we? – Omni International LLC is a very progressive supplier of gloves in markets including Medical/Dental (all healthcare), food service, retail/consumer, industrial/janitorial and clean room.

What are vinyl gloves? Vinyl gloves provide flexibility and natural fit without the risk of allergic reactions to latex proteins. These gloves are manufactured of virgin PVC resins, and offer great flexibility for a wide variety of applications. Vinyl gloves, for example, withstand some chemicals and industrial cleaners better than some latex gloves.

Powder free vinyl gloves, in addition to being used for medical applications, are often used for industrial and packaging applications. The absence of powder makes them ideal for manufacturing and packaging such items as electronics and components.

Vinyl gloves are a great choice for individuals seeking an alternative to latex. Because of latex allergy issues, OSHA has recommended that workers use latex gloves only in situations that require protection from blood borne pathogens and other infectious agents. Vinyl gloves have experienced strong growth from those concerned about worker safety and the liability issues currently surrounding latex allergies. All vinyl examination gloves must now achieve the standard AQL level of 2.5

OmniTrust™ Vinyl Powder Free - #312 Series - An excellent non-latex value. OmniTrust™ Vinyl Medical Examination Gloves are formulated for comfortable fit and tactile sensitivity. They are DOP/DEHP (di-octyl-phthalate / di-2-ethylhexyl phthalate) free and safe for use in food service applications. Flat packed for optimum dispensing. Available in sizes Small through Extra Large.

Features and Benefits

DOP/DEHP Free – These plasticizers are recognized as potential health hazards in other products. Due to the potential of finding further issues and to support over 120 acute health care facilities and groups, Omni manufactures a DOP/DEHP Free vinyl glove. Contact Omni for a special sheet on DOP/DEHP.

Latex Free – Safe for use for the person who prefers a latex feel and conformity to the hand

Powder Free – Less Than 50µg of Total Extractable Protein Per Gram

Perfect for many markets especially:

Long Term Care – The Omni #312 Vinyl Glove is the product of choice in long term care. Its high quality, comfortable fit and competitive price make it very attractive.

Medical/Laboratory – An excellent glove for general use throughout the health care facility.

Veterinary – Excellent for holding small animals, especially those with slick skins.

General – For years, vinyl gloves have been accepted and used throughout health care.
