

**Product Data EXTRA**  
**Supplement to GLOVE LINES**  
**OmniTrust CF Synthetic Gloves**

**Who are we?** – Omni International LLC is a very progressive supplier of gloves in markets including Medical/Dental (all healthcare), food service, retail/consumer, industrial/janitorial and clean room.

**What are synthetic (vinyl) gloves?** Traditionally, a “synthetic” glove refers to a vinyl glove with more stretch. That is why they are often called “stretch” vinyl. Vinyl gloves provide flexibility and natural fit without the risk of allergic reactions to latex proteins. These gloves are manufactured of virgin PVC resins, and offer great flexibility for a wide variety of applications. Vinyl gloves, for example, withstand some chemicals and industrial cleaners better than some latex gloves.

Vinyl gloves are a great choice for individuals seeking an alternative to latex. Because of latex allergy issues, OSHA has recommended that workers use latex gloves only in situations that require protection from blood borne pathogens and other infectious agents. Vinyl gloves have experienced strong growth from those concerned about worker safety and the liability issues currently surrounding latex allergies. All vinyl examination gloves must now achieve the standard AQL level of 2.5

**OmniTrust™ Vinyl Powder Free - #412 Series** - An excellent non-latex value. A powder free, non-latex, stretch vinyl Comfort Formulation glove. OmniTrust™ Vinyl CF Medical Examination Gloves are formulated for maximum comfort and more tactile sensitivity than our traditional vinyl glove. They are DOP/DEHP (di-octyl-phthalate / di-2-ethylhexyl phthalate) free and safe for use in food service applications. Flat packed for optimum dispensing. Available in sizes Small through Extra Large.

### **Features and Benefits**

**DOP/DEHP Free** – These plasticizers are recognized as potential health hazards in other products. Due to the potential of finding further issues and to support over 120 acute health care facilities and groups, Omni manufactures a DOP/DEHP Free vinyl glove. Contact Omni for a special sheet on DOP/DEHP.

**Latex Free** – Safe for use for the person who prefers a latex feel and conformity to the hand

**Powder Free** – Less Than 50µg of Total Extractable Protein Per Gram

**Perfect for many markets especially:**

**Acute Care** – Our #412 series has become a very popular glove in the acute care setting. Since it is latex free and less expensive than latex and nitrile, “stretch” vinyl (or synthetic) is an excellent alternative for budgetary reasons.

**Long Term Care** – The Omni #412 Vinyl Glove is gaining popularity in long term care. Its high quality, Comfort Formulation fit and competitive price make it very attractive for the facility that prefers latex, but prefers a “non-latex” product..

**Medical/Laboratory** – An excellent glove for general use throughout the health care facility.

**Veterinary** – Excellent for holding small animals, especially those with slick skins.

**SALES WORD HIGHLIGHTS** - DOP/DEHP FREE – Latex Free – Commonly referred as a Stretch Vinyl -Most Economical comfort fit alternative to latex – Will withstand some chemicals and industrial cleaners better than latex – 100 per box - Flat Packed for Optimum Dispensing

**Ordering Information.** Packaged 100 per box, 10 boxes per case, 1,000 gloves per case.
